GRILL SURFACE THERMOMETER

The NSF® Certified CDN Grill Surface Thermometer (GTS800X) gives chefs the advantage of knowing the exact temperature of their cooking surface. Designed for ease of use in a hectic commercial kitchen, it features a color-coded scale that clearly highlights target temperatures.

The Grill Surface Thermometer sits directly on any cooking surface and provides accurate measurements in 10-degree increments between 100 and 800°F/40 and 425°C. Constructed for durability, it features a sturdy laboratory glass lens that can withstand high heat, and a large, shatterproof, easy-to-read dial.

The Grill Surface Thermometer features a large display that is 2.25 inches (5.7 cm) diameter for easy reading, even in low light. The dial is framed by sturdy 430 stainless steel housing, for durability through the years.

Designed for safe and convenient transport even when hot, the Grill Surface Thermometer features two tabs on the top that can be used to lift and move the unit. Another option is to use a spatula to lift the thermometer from the bottom.

FEATURES

- NSF® Certified
- High heat
- Shatterproof
- Place directly on grill

SPECIFICATIONS

Measurement Range:	100 to 800°F/40 to 425°C
